delivery system **to sooth
and relieve sore throat**

COUGH & COLD CHEWING GUM

This product is used for local and temporary relief of the symptoms of mild buccopharyngeal infections, which are associated with pain and without fever such as: throat irritation, aphonia, small oral sores.

ACTIVE INGREDIENTS:

5 mg of chlorhexidine dihydrochloride and 5 mg of Benzocaine. The active ingredients of this medicine act combining the antiseptic function of chlorhexidine with the local anesthetic function of benzocaine.

FLAVOR: Mint

FORMAT: Blister (2 x 6 gums)

ADMINISTRATION:

1 chewing gum, when necessary, leaving at least two hours between each one. The dosage of eight chewing gums per day should not be exceeded.

AGE:

Adults and children over 6 years of age.

Manufactured in SPAIN following GMP guidelines
Registered in different European countries

A new delivery system

WHY A MEDICATED CHEWING GUM?

- Chewing gum stimulates **prolonged saliva production**, which results in **better throat hydration**.
- Active ingredients remain **longer** in the mouth.
- The prolonged time in mouth while chewing favours **API release**.
- **Efficient delivery, fast action:** the API could be absorbed faster through the oral mucosa.
- Reduced exposure to **gastrointestinal side effects**.
- Convenient, discreet to administer, does **not require water** to swallow.
- May **increase** patient's **treatment compliance**.
- Highly **accepted** by **children**.

Other benefits of chewing

Rises pH levels to neutralize harmful plaque acids

Reduces caries incidence

Reduces demineralization of teeth enamel

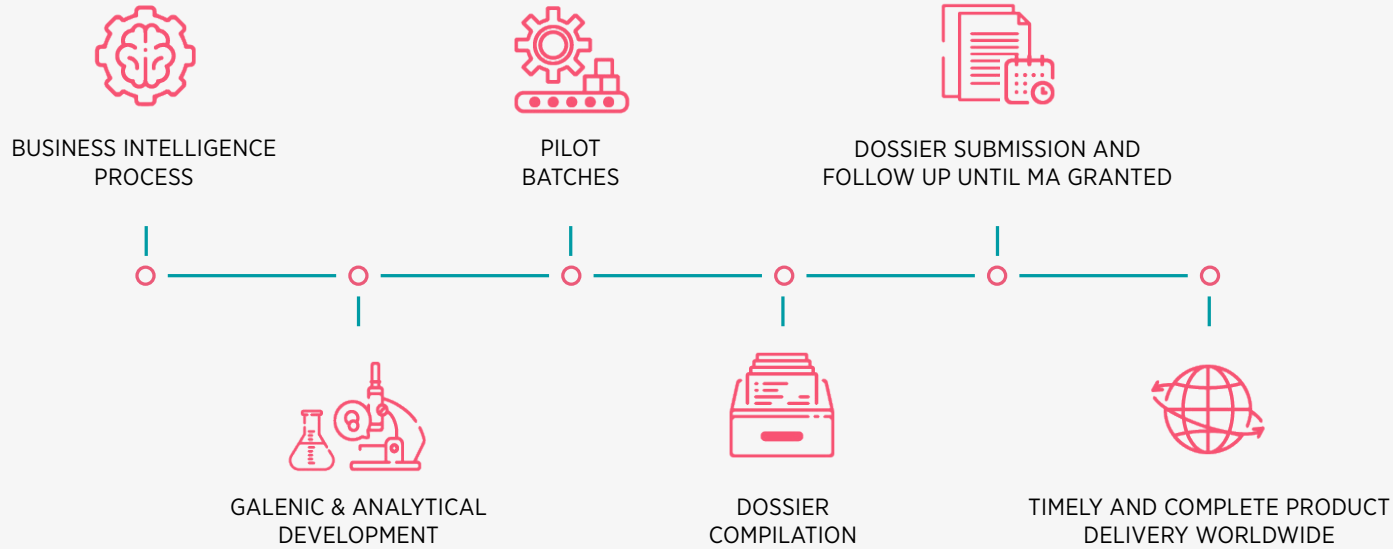

Freshens breath

Helps concentrate and release stress
